Professional Services

Driving successful IT digital transformations can be challenging. With IT Weapons, your organization gets strategic expertise and specialized guidance at every stage. From implementing cutting-edge technologies and bolstering cybersecurity to empowering your team's collaboration & productivity, our Professional Services team enables you to innovate faster and smarter. We assess your current IT landscape, develop a clear IT roadmap, and ensure seamless technology integration of the best solutions to meet your goals.

How We Can Help

With a focus on scalability, flexibility, and continuous optimization, we help your business stay competitive in an ever-evolving digital world. Transform your IT with confidence and unlock your full potential.

- Dedicated teams focused on private cloud, Microsoft, networking and cybersecurity
- Decades of experience and specialized skills sets to enhance your IT goals
- Full scale assessments to understand your current IT environment to identify gaps and areas of improvement
- Focused health checks to delve deep into specific parts of your IT setup to determine issues and provide recommendations
- Specialized workshops to explore upcoming technologies and assist in adoption strategies
- Development of scalable solutions for your organization through design sessions by leveraging our optimized tech stack

Our Suite of Professional Services

Microsoft Modern Work

Our Microsoft Modern Work team optimizes and implements Microsoft 365 apps to deliver productivity, collaboration, and security enhancements to your organization. We can help you create a more agile, secure, and efficient workplace.

Microsoft Azure

In collaboration with our dedicated team of Azure consultants, your organization can take advantage of scalability, flexibility, and cost-efficiency through the successful adoption of Azure and its ongoing management.

Networking

Designing and implementing a network for your organization can be a daunting task. If you add the complexities of security and a distributed workforce, it can become expensive to handle in-house. Our experts help you figure out the right design, strategy and devices for your network.

Private Cloud

Our team can play a crucial role in guiding your organization to implement and manage your private cloud. We bring expertise, resources, and tools to design, deploy, manage, and optimize private cloud environments.

Cybersecurity

As cyber threats become more sophisticated and prevalent, businesses of all sizes face challenges in protecting their data, systems, and networks. Our cybersecurity specialists offer tailored security services to proactively manage and respond to security threats, ensuring protection of critical assets and compliance with industry standards.

Virtualization

From planning and deployment to ongoing management and optimization, our team can develop a comprehensive virtualization strategy to enable your organization to achieve benefits including cost savings, improved performance, and enhanced flexibility.

Application Development

Be it custom app builds or leveraging Microsoft's Power Platform, we can help you streamline your development processes, improve quality, and accelerate time-to-market.
