

All-in-One Backup and Disaster Recovery (BDR)

Whether it's from accidental file deletions, a ransomware attack, or a natural disaster, data loss can weaken your organization. With All-in-One BDR, you can get back to work — on-site or in the cloud.

Get peace of mind knowing that your data is safe with our All-in-One BDR Solution

Our Canadian cloud backup system is SOC 2 Type II-certified and works in synergy with an on-site device, ensuring reliable backup, business resiliency and maximum organizational productivity.

Major Causes of Data Loss and Downtime:

- Ransomware Attacks
- Human Error / Accidental Deletions
- Power Outages / Natural Disasters
- Major Hardware / Software Failure
- Insider Threats

Key Benefits:

- Virtualize and restore critical servers locally and in the cloud
- Seamless management of critical data restoration and incidents by our in-house experts
- Rapid data recovery with optimized Recovery Point Objective (RPO) and multiple recovery points
- Advanced ransomware detection and recovery
- Highly adaptable to your business with flexible and scalable storage and data retention

Bolster your data and business operations with our All-in-One BDR Solution

All-in-One BDR is a fully managed, comprehensive cloud backup solution that combines automation, security, scalability, and expert support. It's secure, capable of handling unexpected challenges and ready to scale as you grow.
